(54) Title: A DEVICE FOR INJECTING MEDICAL SUBSTANCES

(57) Abstract: A device for injection, comprising a body (1) provided with a first channel (2) for conveyance of a first medical substance and a first connecting component (3) having a first port (4) for introduction of a first medical substance into said first channel (2), the connecting component (3) being connectable to an external unit, and a second channel (5) for conveyance of a second medical substance and a second connecting component (6) having a second port (7) which can be opened by means of an injection component for injecting a second medical substance into said second channel (5), and provided with a third connecting component (8) being common to the first and the second channels (2, 5) and having at least one third port (9) for conveying medical substances out from said first (2) and second (5) channels, the first (3), second (6) and third (8) connecting components and the body (1) being designed as an integrated unit.
